EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Orange on 2/22/05.

The application has been amended as follows: the specification has been amended and claim 11 has been cancelled. Please enter the attached amendment.

2. The following is an examiner's statement of reasons for allowance. The present invention is directed to a method for generating a shared secret value between two groups (entities) in a data communication system, at least one group having a plurality of members. More specifically, independent claim 1 identifies the uniquely distinct features "for each member: computing an intra-entity public key by mathematically combining its short-term private key, the long term private key and said intra-entity shared key" and "each entity computing a common shared key K by combining its group short term public key, with the intra-entity shared key, and an entity long term public key received from the other entity". The closest prior art, Steiner et al. (CLIQUES: A New Approach to Group Key Agreement), discloses a method for generating a secret value shared among members of a group using the generic n-party Diffie-Hellman key agreement protocol. Another prior art, Menezes et al. (Handbook of Applied

Cryptography), discloses a method for generating a shared secret value between two parties each belong to two distinct security domains (fig. 13.8). The prior art, taken either singly or in combination, fails to anticipate or fairly suggest the limitations of applicant's independent claim, in such a manner that a rejection under 35 U.S.C 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minh Dinh whose telephone number is 571-272-3802. The examiner can normally be reached on Mon-Fri: 10:00am-6:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barron can be reached on 571-272-3799. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
